

Applications

- ☒ Decantation pond
- ☒ Purification station
- ☒ Lagoon

OBIOFIX P ANTI-ALGAES

Bio-treatment of algae into water body

Packaging

1 x 25 kg

Characteristics

Aspect: Grey powder
Odour: na
pH : 7,4

Compliance

Norm: AFNOR NF X 42-040
Directive: 2000/54/CEE

Dosing

Maintenance

OBIOFIX P Anti-algae	Water body
25gr to 50gr	per m3

Choc action

OBIOFIX P Anti-algae	Water body
50gr to 100gr	per m3

Biotechnology

The biological balance of water bodies is often broken. The water is murky and green, with the formation of odours. **OBIOFIX P ANTI-ALGAES** rebalances the aquatic environment by a contribution of microorganisms and specific oligo elements. It effectively fights against the proliferation of green algae.

Through its marine origin, **BIOFIX P ANTI-ALGAES** brightens the water and eliminates odours.

Advantages

- Unique biotechnology
- Support the balance of aquatic environment
- Promote the gradual clarification of water
- Kill odour
- Fight against algae and bacterial competition biochemical action
- Safe for users et equipment
- 100% natural and biodegradable
- Neutral pH

Direction for users

- ① **Avoid application during windy day.**
- ② **Powder application**
 - ① Apply **OBIOFIX P ANTI-ALGAES** on surface with a manual spreader
- ③ **Mixed with water (Dilution: 10%)**
 - ① Stir the solution continuously and spread using a sprayer
